**“ We strongly believe that the Company’s success must be based on a strong organization and high quality local competencies. ”**

# 1. Who we are

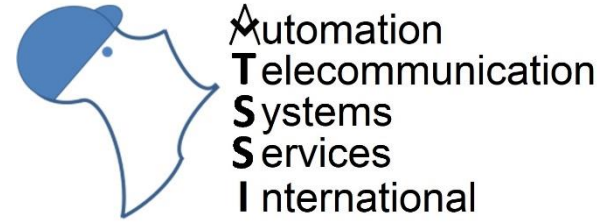

## c) Our Mission

To deliver highest quality of services and tailored systems for the automation, protection and telecommunication infrastructure in the industrial and energy market through the pro-active development of local competencies.

# 1. Who we are

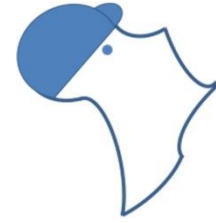

## d) Our Vision

Based on our strong technical roots, market understanding and knowledge of available equipment, we want to develop local organizations working to the highest standards in order to respond to the current and future challenges in the “smart grid” and become one of the major actors through Excellence and proximity to our customers

# 1. Who we are

## e) Our Values

Automation  
Telecommunication  
Systems  
Services  
International

- **Excellence**

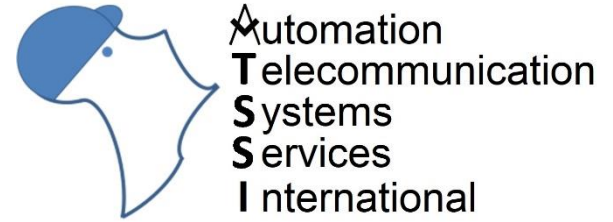

- **Flexibility**

- **Proximity**

## 2. Where we are located

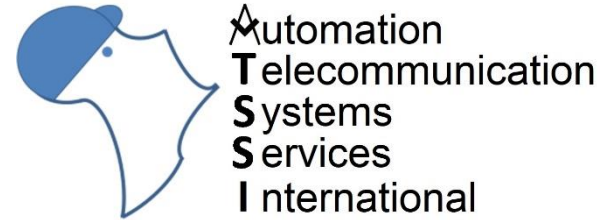

- **Companies Location:**

- **Ireland** : International Office in Limerick
- **Morocco** : Regional Office in Casablanca
- **Algeria** : Regional Office in Algiers

## 2. Where we are located

### a) Ireland

- International Office
- In service since 2018
- Office Location in Limerick
- Managing Director : David Morias
- Managing Board : 2 persons
- Main Functions and activities :
  - Managing the international business
  - Engineering activities
  - Systems proposal
  - Services activities

## 2. Where we are located

### b) Morocco

- Regional Office
- In service since 2013
- Office Location in Casablanca
- Managing Director : David Morias
- Managing Board : 1 person
- Main Functions and activities :
  - Managing the regional business
  - Engineering activities
  - Systems proposal
  - Services activities

## 2. Where we are located

### c) Algeria

- Regional Office
- In service since 2015
- Office Location in Algiers
- Managing Director : David Morias
- Managing Board : 2 persons
- Main Functions and activities :
  - Engineering activities
  - Systems proposal
  - Services activities

# 3. What we do

## a) High Voltage Services

- CT, VT, Earth Testing
- Circuit breaker, Switchgear Testing
- Power Transformer, Auxiliary Transformer Testing
- Auxiliary system, power cable, signalisation cable & high voltage cable Testing
- Acceptance and testing documents
- Substation since 5kV up to 400kV

# 3. What we do

## b) Telecoms

- Telecom Survey (PDH/SDH, PLC, LTE, Wimax, FH, ...)
- Installation of transmission links all types FH, PDH or SDH, PLC, Full IP & Radio solution
- Commissioning and integration of equipment (all types)
- Acceptance and testing documents
- Maintenance of telecom equipments (all types)
- Studies (all types)

# 3. What we do

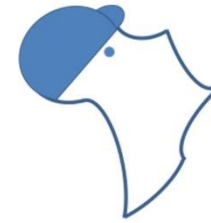

## c) Automation and Protection

- Audit of substations electrical protection equipment, control systems & automation process
- Installation of substations electrical protection equipment and control systems & automation process
- Commissioning and integration of substations electrical protection equipment and control systems & automation process
- Acceptance and testing documents
- Maintenance (all types)
- Studies (Hardware and Software Engineering)

### 3. What we do

## d) System Competencies

Automation  
Telecommunication  
Systems  
Services  
International

**ALSTOM**

**SIEMENS**

**ABB**

## 4. How we work

The secret of our business success is our organization skills and our human potential, composed of:

- Managers and coordinators with extensive experience in various large companies
- Telecommunications, IT, automation and electronics engineers
- Qualified technicians in telecommunication, electricity and electronics

# 5. Why us

- Significant experience in network telecom & automation deployment
- Reactivity
- Market knowledge
- Qualified and experienced resources
- Technology-independent
- Local organization & resources
- Competitive sales approach
